Ahmet Mert Dinçer

Ankara, Türkiye · a.mertdincr@gmail.com · github.com/a-mertdincer · linkedin.com/in/a-mertdincer

Target Roles: Systems Engineer / Platform Engineer · DevOps / SRE · Cloud & Kubernetes Engineer · Full-Stack Developer (Next.js) · Cybersecurity Engineer

PROFESSIONAL SUMMARY

Systems engineer at SDT with hands-on responsibility for an OKD/KubeVirt production cluster, end-to-end DevOps tooling (GitLab CI/CD, Nexus, SonarQube, ArgoCD, TeamCity, YouTrack), and a full observability stack (Prometheus federation, Grafana, Loki, Alloy, OpenTelemetry Collector). Background as a SOC analyst across IBM QRadar, Microsoft Sentinel, CrowdStrike Falcon, and Vectra EDR. Active full-stack developer (Next.js + Supabase) shipping side projects and freelance work. Comfortable from Linux/CoreOS internals up to TypeScript and from packet captures to React Server Components.

EXPERIENCE

Systems Engineer — SDT (Savunma Teknolojileri Mühendislik), GKTY / YİİB Team — December 2025 – Present

Ankara, Türkiye · On-site · Full-Time

- Operate a 3-master OKD cluster with KubeVirt running 22 Xubuntu VMs in a dedicated namespace; bastion + HAProxy front-end and dedicated monitoring host.
- Built and maintain the observability stack: Prometheus federation, Grafana dashboards (pod, cluster overview, and NOC dashboards), Loki, Alloy DaemonSet, OpenTelemetry Collector with bearer-token auth.
- Run the DevOps toolchain end-to-end: GitLab CI/CD with non-root OKD runners (kaniko + privilege SCC, Maven settings via ConfigMap/Secret/PVC mounts), Nexus Docker registry connector, SonarQube CA-trust via init container, ArgoCD with KubeVirt CRD exclusions, TeamCity, YouTrack.
- Identity & RBAC: LDAP identity provider on OAuth, AD domain join via SSSD, RBAC/ClusterRoleBindings for ~18 users across 21 namespaces, kubeconfig distribution, group-based xrdp access.
- Networking: OVN pod-network IP pinning via annotations, NetworkAttachmentDefinitions for VM bridges, Netplan/nmcli static IPs with src-pinned routes, NetworkPolicy isolation across env-groups, UFW fleet management scripts that pull IPs dynamically from the cluster.
- Storage: TopoLVM CSI, CDI StorageProfile fixes, HCO DataVolume troubleshooting, IBM FlashSystem-backed volumes.
- Resolved a 22-day YouTrack/Hub auth outage: traced to JVM heap exhaustion, set jvmoptions to 4 GB, switched to a Recreate deployment strategy, restored base-url consistency.
- Onboarding automation for new users (kubeconfig + RBAC + xrdp + Nexus pull secrets + CA trust distribution).

Cyber Defence Center Analyst — Cyberwise — Feb 2024 – December 2025

Istanbul, Türkiye · Hybrid · Full-Time

- Monitored real-time alerts in IBM QRadar, Microsoft Sentinel, ArcSight, and CrowdStrike Falcon; triaged suspicious activity end-to-end.
- Investigated endpoint threats and supported incident response with Vectra EDR and Microsoft Defender.
- Authored incident analysis reports translating technical findings into actionable intelligence for technical and non-technical stakeholders.
- Prioritized alerts, logs, and security events by impact; identified root causes and contributed to faster response cycles.
- Proposed and contributed to SOC process improvements that strengthened detection coverage.

Research Intern, React.js Web Developer — TÜBİTAK STAR Project (Visseria) — Dec 2021 – Jun 2022

Kayseri, Türkiye · Internship

- Built and maintained front-end components for an AI-powered event photography platform in React.js.
- Iterated on usability and performance through repeated build–measure–learn cycles.

EDUCATION

BSc, Computer Engineering — Erciyes University — Kayseri, Türkiye

- GPA 3.09
- Member, AI / IT & Security Club

Computer Science (Erasmus+ Exchange) — Lublin University of Technology — Lublin, Poland

CERTIFICATIONS

- **CompTIA Security+**
- **INE — Certified Incident Responder (eCIR)**
- **INE — Junior Penetration Tester (eJPT)**
- **TryHackMe — Jr Penetration Tester (PT1)**
- **INE — Certified Cloud Associate (ICCA)**
- **Cisco — CCNA** (Intro to Networks; SRWE; ENOSA)
- **Cisco — CyberOps Associate**
- **Cisco — CCNA: Introduction to Cybersecurity**

SKILLS

Container & Orchestration: OKD/OpenShift · KubeVirt · Kubernetes · Helm · ArgoCD · kustomize
CI/CD & DevOps: GitLab CI · TeamCity · Argo Workflows · kaniko · Nexus · SonarQube · YouTrack
Observability: Prometheus (federation) · Grafana · Loki · Alloy · OpenTelemetry Collector
Identity & Access: LDAP · SSSD · Active Directory · OpenShift OAuth · RBAC
Networking: OVN · Flannel · Calico · NetworkAttachmentDefinitions · Linux bridges · UFW · HAProxy · Netplan/nmcli
Storage: TopoLVM CSI · CDI/HCO DataVolumes · IBM FlashSystem (basic)
Security Platforms: IBM QRadar · Microsoft Sentinel · CrowdStrike Falcon · Vectra EDR · Microsoft Defender · ArcSight
Web App Security: Burp Suite · OWASP ZAP · sqlmap · Nikto · Postman · WhatWeb · Wappalyzer
Mobile App Security: jadx · MobSF · dex2jar · apktool · Drozer · Frida
Network Security: Nmap · Netcat · Wireshark · Metasploit · Hydra · Nessus
Programming: Python · TypeScript / JavaScript · Bash · Go (basic) · C# (basic)
Frontend: Next.js · React · Tailwind · App Router · next-intl
Backend: Supabase · PostgreSQL (with RLS) · Node.js · ASP.NET MVC · Entity Framework
OS: Linux (RHEL/CoreOS, Ubuntu/Xubuntu) · Windows Server (AD) · macOS
Cloud: AWS (basic) · Azure (basic)
Tooling: Git · GitHub · Docker · VS Code · draw.io

LANGUAGES

- **Turkish** — Native
- **English** — C1

INTERESTS

- Reverse engineering and cyber puzzles
- Game development and immersive level design
- Music production and curated playlists
- Walking urban landscapes and rebuilding fitness routines
- Contemporary fiction and cybersecurity literature
